About the Titan TG-150

With control and mobility in mind, the Titan TG-150 was specifically designed for reinforced testing.

Mounted to a Mercedes Axor, this customisation allows the truck to act as a counterweight that prevents the rig from lifting mid-test and provides the reaction force needed to offset the 190kN of thrust applied while advancing the CPTu probe and rods at a constant 2cm per second.

The Axor is also equipped with built-in outriggers for added rig stability.

TECHNICAL SPECIFICATION

Maximum Thrust Force	19 Ton / 190 kN
Maximum Retraction Force	18 Ton / 180 kN
Operating System Pressures	250 bar / 25Mpa
Combined Rig Weight	15 Tons

TITAN TG-150

Onboard CPTu controls for precision testing.

The Mercedes Axor is fitted with a Pagani TG-150 mast and an onboard computer system for real-time data readouts.

The mast is securely mounted to the Axor flatbed for improved operator mobility.

Outriggers attached to the Mercedes Axor provides increased stability.

TITAN TG-150

The GeoGroup

GeoGroup comprises of a group of companies, each a leader in its own field, providing a range of services to the geotechnical, civil, mining and energy industries.
